

THAAIMAAMAN THANGA MOTHIRA THITTAM (TMTMT) INAUGURATION

In accordance with the directives issued by Dr. Darez Ahamed, I.A.S., Health Secretary to the Government of Tamil Nadu, Flagship program by Tamil Nadu government, the "Thaaimaaman Thanga Mothira Thittam" provides a one-gram gold ring to every newborn delivered at government health facilities across the state. This landmark scheme is being formally launched by the Honourable Chief Minister on September 28, 2026, in Madurai, with the distribution of gold rings simultaneously commencing on the same day across all Hub and Spoke facilities statewide.

Our institution, Theni Government Medical College and Hospital, serves as one of the designated Hub and Spoke facilities in the Theni district. The Spoke facilities operating under our institution include Bodi GH, Aundipatti GH, M. Subbulapuram Block, Kandamanur Block, and Dombucherry Block.

On the same day 28-09-2026, after inauguration by the Honourable Chief Minister at Madurai, we also started distribution of the one-gram gold ring to the newborn babies delivered at Hub and spokes.

The first infant to receive the one-gram gold ring from our respected Dean Dr. M. Rohini Devi M.S., is Baby Rathnasree, the daughter of Valli, residing in Velappar Kovil within the M. Subbulapuram Block. The presentation took place in the presence of the District Health Officer (DHO) and the Block Medical Officers (BMOs) of the M. Subbulapuram and Kandamanur Blocks, after which the distribution continued for the remaining eligible babies. This initiative will remain a continuous, uninterrupted process moving forward.

This achievement was made possible solely through a unified team effort, driven by the brilliant guidance and calm, composed leadership of our respected Dean. It is the result of the tireless, seamless, and dedicated efforts of multiple administrative and clinical wings, including the Deputy Custodians team, Register Maintenance team, PICME Portal Entry team, Beneficiary Verification team, and the TMTMT Portal Proceedings Generation team. Equal credit goes to the QR Code Scanning and Ring Allocation team, the Distribution Point Nodal Officers, and the Office Administration team. As a collective unit, we are committed to sustaining this exceptional team spirit moving forward.

Dr. M. Thiruvankadam MD,
Deputy Custodian,
Associate and Head,
Department of Community medicine,
GTMCH, Theni.
