**DEPARTMENT OF COMMUNITY MEDICINE ORGANISED DENGUE AWARENESS RALLY
ON 29TH SEPTEMBER 2026**

DEPARTMENT OF COMMUNITY MEDICINE ORGANISED CEP ON MONSOON DISEASES AND ITS PREPAREDNESS FOR HEALTH PERSONNEL ON 29TH SEPTEMBER 2026

Under the guidance of the Dean, Dr. M. Rohini Devi, M.S., madam, the Department of Community Medicine, Government Theni Medical College and Hospital (GTMCH), organised a Dengue Awareness Rally and a Continuing Education Programme (CEP) on “Monsoon Diseases and Their Preparedness” for Health Personnel on 29th September 2026.

The Dengue Awareness Rally was organised with the objective of creating awareness among the healthcare personnel regarding dengue prevention and control measures and promoting the importance of maintaining a clean environment, eliminating mosquito breeding sources, and adopting appropriate preventive practices.

The rally commenced from the Administrative Block and was flagged off by the Vice Principal, Dr. D. Kavitha, M.D., madam in the presence of the Resident Medical Officer (RMO), Assistant Resident Medical Officers (ARMOs), and Deputy Secretary (DS). MBBS students, faculty members and students of the College of Nursing, GTMCH, including Mrs. Palaniammal, and faculty members and students of NRT College actively participated in the rally.

The rally was coordinated by the nodal person, Mrs. Umamaheshwari, College of Nursing, GTMCH, Theni. During the programme, Dr. M. Thiruvankadam, M.D., Associate Professor and Head, Department of Community Medicine, delivered a health education talk on the prevention and control of dengue. He emphasised the importance of individual responsibility, source reduction, personal protective measures, and active community participation in preventing the spread of dengue. The participants actively raised awareness slogans and conveyed important messages to the public regarding dengue prevention, mosquito control, elimination of mosquito breeding sources, and adoption of appropriate personal protective measures.

The rally concluded at the 250-seat Lecture Hall, where a Continuing Education Programme (CEP) on “Monsoon Diseases and Their Preparedness” was organised for health personnel. The programme aimed to strengthen the knowledge and preparedness of healthcare personnel in the early identification, prevention, and management of diseases commonly associated with the monsoon season, with particular emphasis on dengue and other vector-borne diseases.

As part of the scientific programme, Dr. M. Thiruvankadam, Associate Professor and Head, Department of Community Medicine, delivered a session on “Trends in Dengue, Individual Responsibility and Community Participation.” He highlighted the changing trends in dengue and emphasised the importance of individual responsibility and active community participation in dengue prevention and control.

The session on “Epidemiology of Monsoon Diseases” was delivered by Dr. A. M. Veerakumar, Associate Professor, Department of Community Medicine, who discussed the epidemiological aspects of common monsoon-related diseases and their prevention and control measures.

The Dengue Awareness Rally and Continuing Education Programme were successfully conducted with the active participation of faculty members, students, and health personnel. Following the programme, vector control activities were carried out within the college premises, focusing on the identification and elimination of potential mosquito breeding sites and promoting a safe and healthy environment in of our college.

The college and hospital premises have been demarcated into four blocks as follows.

Block	Areas
A	1. Administrative block, 2. College building, 3. Exam hall, 4. Auditorium, 5. Siddha block, 6. Psychiatry block, 7. New building.
B	1. Causality, 2. Police station, 3. Birth and Death room, 4. Wash room, 5. 108 building, 6. Blood bank, 7. Tea shop.
C	1. OP building, 2. MRI, 3. Car parking, 4. Post mortem room, 5. Canteen, 6. IOB bank.
D	1. Women hostel, 2. DGNM hostel, 3. Dean quarters, 4. Doctor quarters 5. MBBS boys hostel, 6. Resident doctors block, 7. Play ground.

Vector control measures, including source reduction, anti-larval measures, and indoor and outdoor fogging, will be carried out periodically on a weekly basis, preferably every Thursday, to ensure effective prevention and control of mosquito breeding and vector-borne diseases. Under the supervision of the Head of the Department, Department of Community Medicine, the designated Nodal Person from the Department of Community Medicine shall coordinate with the Health Inspector (HI) from the DPH side and the Sumeet workers, as allotted by the Manager, Mr. Illayaraja, on the preceding day of each week.

The Nodal Person shall ensure proper coordination and monitoring of the vector control activities and shall maintain pre- and post-activity photographic documentation for record and submission.

**Vector Control measures including Source reduction, Anti larval measures,
Indoor and outdoor fogging done at D Block on 1.10.2026**

Dr. M. Thiruvankadam MD CM.,
Associate and Head,
Department of Community Medicine,
GTMCH, Theni.
